

Steamer Metos Marvel E1

Intelligent Metos Marvel pressure steamer is a fast and efficient tool for lunch and à la carte production in modern professional kitchens.

Metos Marvel pressure steamer cooks, defrosts and regenerates all types of food products, including delicate items.

Thanks to Metos Marvel's speed and efficiency you can prepare a meal just before serving it, thus ensuring its freshness.

Gentle and healthy steam cooking retains the texture, nutrients and color of the products.

Additional portions made of various ingredients can be prepared quickly,

as Metos Marvel needs no preheating. Many dishes can be cooked

simultaneously without the flavors transferring from one food to

another. Its ease-of-use with built-in programs improves the efficiency and competitiveness of every kitchen.

Exact cooking control with 1°C precision or a core temperature probe

placed in the product speed up the process and prevent overcooking.

Cooking temperature range is 40-120°C (low-temperature cooking/thaw

40-80°C, normal cooking 80-100°C, express pressure cooking 100-120°C).

Main menu offers two pre-set settings: 0.5 and 1 bar. Delta-T cooking

allows you to define the temperature difference between the compartment

and the inside of the product. Especially useful for cooking sensitive or hard foods.

Colored, informative touch screen is large and easy to read. Core temperature, compartment temperature and remaining cooking time are clearly displayed. Large, intuitive touch symbols make the steamer quick and effortless to use. Your own programs can be easily saved and selected. Memory space for up to 10,000 programs. Timing option 0-99 hours with 1 second precision. Favorites list for easier, faster use. Favorite programs are available on the main screen menu. Advanced safety equipment and monitoring technology make the cooker safe to use. Thanks to the advanced safety locking system, the door is quick to open and to close. The door cannot be opened if the compartment is under pressure or a program is running (can be discontinued, if necessary). Handle is ergonomic and insulated and it's easy to use with one hand. Water dripping from the door and containers is collected in a drip pan..

- completely stainless steel, chamber of acid resistant steel
- removable guide rail rack with 6 rail pairs, machine washable
- capacity 4 x GN1/1-65 mm (guide distance 103 mm)
