

METOS Rototoaster TL 5410

Installation:

The toaster is supplied with a 13 amp cable and **MUST** be earth connected.

Switches:

The toaster has two switches:

Heating plate (right switch with light).

Conveyor (left switch).

*When the heating plate is turned on, the conveyor **MUST** be switched on too, to avoid damage on the conveyor.*

Temperature:

Temperature can be regulated from 50 - 300 °C.

Cleaning:

Outside it is done with cloth and general cleansing agent for fat.

Cleaning the heating pan (Teflon) may only happen with wooden scraper and the like.
